# 1590 Series EmLock®

The SDC 1590 Series is a compact mortise  $EMLock^{\textcircled{R}}$  with 850lbs. of holding power packed in a 10"L x 1-7/16"W x 1-1/2"D steel case.

The 1590 EMLock<sup>®</sup> is ideal for securing sliding or \*swinging, manual or automatic doors. Its durability for high frequency use and its mortise installation make it the choice of specification writers, owners and architects.

With only two parts, the lock mortised in the frame and the armature in the door, the  $\mathsf{EMLock}^{\circledR}$  secures the door in a closed position. When power is cut the  $\mathsf{EMLock}^{\circledR}$  releases instantly.

When used with industrial sliding doors, two 1590  $EMLock's^{\circledR}$  may be used to provide up to 1700 lbs. of holding power.

## **Standard Features**

Holding Power: 850 lbs.

Electrical Data: 350 mA @ 24V

700 mA @ 12V

12VDC and 24VDC standard 12VAC and 24VAC optional (BR64 rectifier required)

Built-in inductive kickback protection

12" 18 GA power leads

Lock Size: 10"L x 1-7/16"W x 1-1/4"D

Armature Size: 6-5/16"L x 1-1/2"W x 1-1/4"D

Mounting

Hardware: Package includes standard fastening

screws and mounting tabs required for most installations (Armature mounting plate is optional).

Construction: The magnet core is permanently

sealed in an epoxy filled steel case.
