

STI KNOCK-KNOCK DOOR CHIME

STI-30092

PRODUCT OVERVIEW

This convenient product helps take the guess work out of knowing if someone is knocking on the door. Knock-Knock is activated by the vibration caused from knocking on a door and transmits a signal to the receiver which will chime – alerting owners when someone has arrived. The wireless transmitter allows the chime to be placed anywhere in the house or office up to 100 feet from the door.

HOW IT WORKS

Easily mount the sensor on the inside of a door with double-sided foam tape or the screws provided. Place the battery powered wireless transmitter anywhere in the home or office up to 100 feet from the door. The smart sensor is only activated by a knocking vibration. STI backs the Knock-Knock with a one year warranty.
