DESCRIPTION

Sure-WaveTM Hands-Free Switch is an active infrared device designed for use with an automatic door operator or door-locking product (such as an electric door strike or magnetic lock) where physical contact with a switch poses a health risk or is simply inconvenient. The switch assembly will fit in a variety of locations from a 1 3/4" door frame to a single or double gang electrical box.

Sure-Wave[™] hands-free switches are American Disability Act (ADA) compliant, and provide barrier free access and egress to buildings and washroom facilities. The rugged construction and relay rating make them ideal for use on low-energy automatic doors, drive-up windows, and interior and exterior doors in virtually any commercial (office, retail), institutional (school, hospital or clinic), or industrial (manufacturing) facility.

ARCHITECTS / ENGINEERS SPECIFICATIONS

All door activation switches to be used throughout the facility shall be CM-324 Sure-Wave™ Series active infrared hands-free switches manufactured by Camden Door Controls.

The switches shall be jamb/narrow, single gang or double gang, as required. They shall have an on-board LED for ease of set-up, fail-safe or non-fail-safe selectable, have an adjustable operating range of 1"-26" and a relay contact rating of 5 amps @ 30 VDC. The switches shall also be ROHC compliant. Switches mounted outdoors, or exposed to interior water/humidity shall be mounted with weather resistant integral rubber gasket and back box, supplied by the same manufacturer.
