IKALL METAL SERIES SBTOP AND VIP DIGITAL CALL MODULE

Complete with 128x64 dot graphic LCD display and keypad with 21 buttons backlit with blue LEDs. Also works as electronic key code. Two search buttons are used to scroll through the names; alternatively, the first letter of the required name can be entered. Once the desired username is displayed, simply press the call button. The call can also be made by directly entering the user code. It can also be used to customise an initial welcome message and can operate with a dual user interface language. It can be used in conjunction with Simplekey electronic keys for automatic updating of the names in the directory. For the SBC system (factory setting), the electronic name directory saves up to 3500 user names and 6000 lock-release passwords. Users and settings are simple to programme using PC software art. 1249B (included, with USB connection cable) via a USB or RS485 port, or locally on the digital module itself. It is compatible with all SBTOP products and functions. It can be used for the call addressing of up to 120000 users. Includes the Cd-Rom holding the serial download SW art. 1249B for installation to PC and the USB connection cable. For use with the VIP system, the module configures itself automatically once wired to A/V unit 4682C. Users and settings are simple to programme using VIP Manager software Art. 1449 via VIP ethernet bus, or locally on the digital module itself. Dimensions: 112x180x40 mm.
