MuxLab

Overview

The Wall Mount Balun Fixture (500910) allows any MuxLab square balun to be installed behind a Decora® compatible wall plate for custom AV installation.

The baluns may be installed with the RJ45 either front or rear facing depending on where the Cat5 cabling will enter or exit the system. At the head end, the appropriate MuxLab baluns are installed near the equipment to support a fully Cat5 cabling solution.

Each balun snaps into place and is held firmly by a spring latching mechanism. The one-piece design makes the product easy to install and maintain. There are no parts to lose or replace.
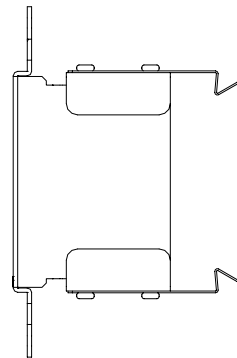

Applications

Custom AV installations
Home AV systems
Boardroom systems
Digital signage systems

Features & Benefits
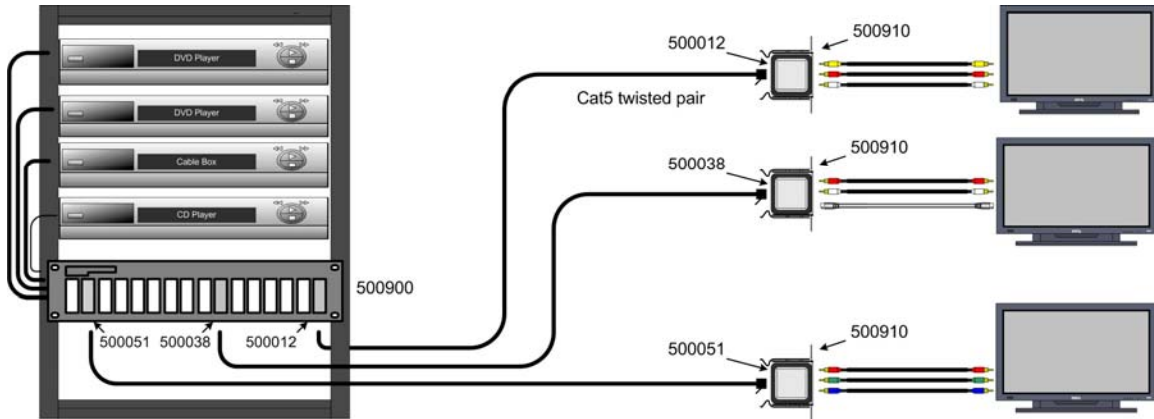

Supports one (1) MuxLab square balun
Decora® compatible
One-piece design
Spring clip holds balun securely in place
