www.boschsecurity.com

**BOSCH**  
Invented for life

- ▶ Three separate supervised prioritized inputs activate three electrically-isolated signals
- ▶ Power taps for high dBA and standard dBA
- ▶ Low current draw with low temperature compensation
- ▶ Candela rating of 15 cd (75 cd on axis)
- ▶ Voltage inputs polarized for use with reverse polarity supervision systems

These Wheelock Multitone, Fixed-candela Electronic Appliances provide a candela rating of 15 cd (75 cd on axis) and eight groups of three distinct self-prioritized sound outputs from separate electrically-isolated input terminals. Priority 1 overrides all other commands upon activation. Choose from high dBA or standard dBA sound output. These appliances operate on 24 VDC, filtered or FWR. Use these appliances in suppression releasing systems, combination security and emergency evacuation systems, and high risk installations.

## Functions

### Self-Prioritized Tones

Choose any of the following eight groups of self-prioritized tones:

### Self-Prioritizing Groups

	Priority 1	Priority 2	Priority 3
1	Horn	Bell	Siren
2	Code 3 Horn*	Siren	Vibrating Chime
3	Slow Whoop	March Time Horn	Hi-Lo

4	March Time Horn	Hi-Lo	Vibrating Chime
5	Code 3 Horn*	Bell	Siren
6	Siren	Horn	Vibrating Chime
7	Bell	March Time Horn	Siren
8	Code 3 Tone*	Hi-Lo	Siren

\* The Code 3 Horn and Code 3 Tone , when set for high dBA, incorporate the temporal pattern specified by ANSI and NFPA for standard emergency evacuation signaling. Use them only for fire evacuation signaling and not for any other purpose.

### Notice

The prioritized tones used in each group are factory set and cannot be changed.

### Sound Output Setting

The sound output (high dBA or standard dBA) is set by a DIP switch.

## Installation/configuration notes

### Compatible Products

The following products are compatible with the AMT-241575W Horn Strobes:

Category	Product ID	Product Description
Control	D7022 <sup>1</sup>	Conventional FACP
Panels	D7024 <sup>2</sup>	Addressable FACP
	D7024	Conventional FACP
	D8024 <sup>1</sup>	Analog FACP
	D9124 <sup>1</sup>	Addressable FACP
	D10024A <sup>1</sup>	Analog FACP
	FPD-7024 <sup>2</sup>	Addressable FACP
	FPD-7024	Conventional FACP
Modules	FPA-1000	Analog Addressable FACP
	SM-12/24-R	Synchronization module (red)
	DSM-12/24-R	Dual synchronization module (red)

<sup>1</sup> For synchronization, use the SM or DSM modules with these control panels. The synchronization module must be set for 24 V operation. When used, the D7022 must be set for 24 VDC operation.

<sup>2</sup> When used with a D7039 Multiplex Expansion Module, the FPD-7024 and D7024 become addressable fire alarm control panels (FACPs).

### Mounting Considerations

Mount these horn strobes on the indicated back boxes for the indicated applications:

	Conduit Applications	Surface Mounted	Semi-flush or Flush Mount
Double-gang			•
Four-inch square*		•	•
DBB Back Box*		•	•
IOB Back Box	•	•	

\* Use an ISP2 Surface Adapter between the electronic appliance and the back box.

### Retrofit Applications

Where an oversize electrical box is already installed, the AMT horn strobe can be installed with the RP-R Retrofit Plate that measures 8 in. (20.3 cm) high by 5.875 in. (14.9 cm) wide.

### Outdoor or Severe Environment Applications

For an outdoor application or a severe environment (NEMA 3R) application, the horn in combination with an IOB Indoor-Outdoor Back Box must be mounted on a flat wall using the supplied mounting ears such that the wall covers the entire rear surface of the back box. The back box must have its drain holes pointed toward the ground. The knockouts in the rear surface of the back box must remain intact. Use the supplied hole plugs to seal the unused mounting holes on the horn's grill.

### Wiring

#### Notice

The Continuous Horn and Bell can be used on coded systems with a minimum on-time of 0.25 sec. Do not use the other tones of these horn units in coded or pulsed signaling circuits.

The input terminals accept wires with diameters between 18 AWG and 12 AWG (ISO 0.75 mm<sup>2</sup> and 4 mm<sup>2</sup>).
