INTEGRATED TELEPHONE ENTRY AND ACCESS CONTROL SYSTEM

APPLICATION

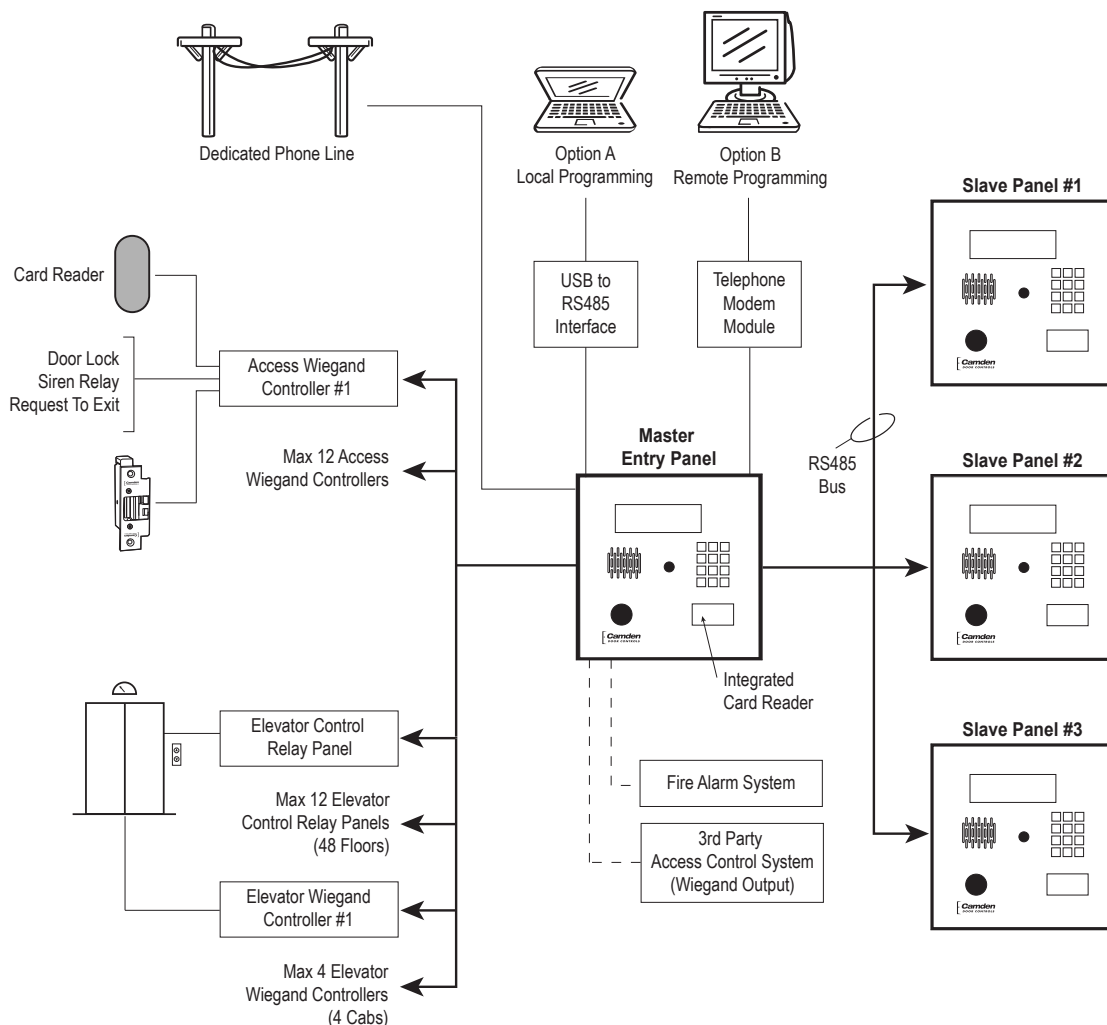

CV-TAC400 integrated telephone entry and access control system is ideal for multi-unit residential and commercial buildings, with up to 500 suites/names.

As a stand-alone telephone entry system, CV-TAC400 provides maximum performance, durability and economy. In a multi-panel (up to 3 slave panels), integrated configuration (telephone entry and card access) or with multiple locations, CV-TAC400 provides unprecedented performance and value.

DESCRIPTION

CV-TAC400 delivers a new level of sophisticated and fully integrated telephone entry and access control to small and mid-sized projects. Best of all, the CV-TAC400 Series has been designed for easy installation and property management. The system can be ordered for local (hardwire) programming via USB connection, where there is on-site management. Or it can be supplied with a modem, making it ideal for multiple building, off-site system management.

The system provides the ability to add fully integrated card access performance, easily and affordably. Both the telephone entry and access control systems utilize a common configuration and reporting software platform. CV-TAC400 is offered with a choice of HID/AWID format prox readers. Camden also offers a wide selection of other Wiegand keypads, and RF controls that may be used with the system.
