

CAMDEN CX-22 vs ICORZ iTi-200S

	CX-22	iTi-200S	CX-22 ADVANTAGES
DESCRIPTION:			
Application 1 Normally Unlocked Washroom	Yes	Yes	Basic washroom door applications.
Application 2 Normally Locked Washroom	Yes	No	A growing requirement (ie. doctors offices, and staff washrooms at schools.)
Application 3 Washroom with Assistance Required Input/Output, or 2-Door Shared Washroom	No	No	2-door shared washrooms, or applications with more complicated wiring are easily done with Camden's EMF-2 washroom controller.
2 Terminal Power Input (Non-Polarity Sensitive)	Yes	No	Using 3-terminals can lead to confusion, resulting in board damage. Not so with our 2-terminal design.
Stable Power Supply and On-board MOV	Yes	No	CX-22 offers highest voltage tolerance, longer life, and reduced callbacks.
4 Dedicated Inputs each with their Own Terminals (2)	Yes	No	Simplified and straightforward wiring. Less wires per terminal means faster install.
Timer Adjustment	Pots (3)	Pots (3)	User friendly design, very easy to make timing adjustments.
Relay Outputs	2@3 Amps.	2@3 Amps.	Handles most electric strikes and or magnetic locks.
Product Wrap Provided	Yes	No	Provides protection for product when installed in header.
Warranty	3 years	1 year	Camden offers a better product and support it with the best warranty in the market.
Available as KITS (with Switches, Contacts, Signage, Power Supplies)	Yes	No	CX-22 kits provide one-stop-shop approach, less SKU's & great pricing. Several kits are available.
