Cypress Suprex SPX-5000 Series Overview

This manual covers the operation and setup of the Cypress Suprex RF SPX-5000 series wireless units.

Overview:

The SPX-5000 series of RF Wireless solutions provides a wireless bridge from card readers with gates or door hardware to most access control manufacturers panels. The SPX or Suprex® products include both the remote (Door/Gate) unit and the central (AC Panel) unit. In the case of the SPX-5000 series of wireless products optional repeaters / extenders are also available.

Features:

- Includes complete solution with remote (reader/gate/door) and central (panel) interface.
- Service mode for setup and configuration.
- “Quiet” protocol to conserve bandwidth and power
- Field configurable reader formats
- Multifunction indicator for determining operational status of the unit
- Auxiliary I/O connections available for Door/Gate/Panel status signaling.
- Multiplexing of RF bridge providing for additional door/gate on a single RF link.
- Economical expansion capabilities using Suprex Lynk technology
