HRG Performance Series DVR

480 IPS (NTSC) 4, 8, 16 CHANNEL EMBEDDED DIGITAL VIDEO RECORDER

The HRG series digital video recorder (DVR) offers clear crisp video using H.264 video compression and supports a high-end feature set that exceeds the needs of many surveillance applications at a very economical price!

Recording at a rate of up to 480 (16ch), 240 (8ch), or 120 (4ch) images per second 4CIF real-time NTSC video, the HRG DVR supports a wide variety of capabilities such as smartphone remote access (apps for Apple® iPhone® and Android™), mouse control, IR remote control, and multiple search engines to quickly find the evidence video. In addition to remote access from iPhone and Android devices, HRG can be remotely accessed via a Web browser or by using multi-site remote access software.

Two USB ports enable intuitive mouse control and simultaneous DVR operations such as backing up video evidence files onto USB media. A viewer is included with each clip, making it easy for investigators to view video evidence. HRG supports continuous and event recording and is configurable per channel. HRG can also be configured to record upon detection of motion within a user-specified area. Recording upon detection of motion can be used to maximize storage efficiency.

Market Opportunities

Supporting an advanced feature set and low pricing, HRG is an ideal DVR for a wide variety of surveillance applications including small to medium-sized retail outlets, apartment buildings, warehouses, and educational facilities. HRG is well suited to support applications that rely on capturing maximum detail of activity through building entrances and exits, and clear video playback.

Remote access from mobile and fixed locations opens up many new application possibilities for HRG. Business owners on the move in this highly mobile society can check in on their businesses from virtually any location with Internet access.
