Honeywell

6280W/6280S
COMMERCIAL COLOR GRAPHIC VOICE TOUCHSCREEN KEYPAD FAMILY

Honeywell's feature-rich 6280 Color Graphic Voice Touchscreen Keypad family gives you the opportunity to close more sales, increase retention and capture new markets.* They feature a high-resolution 7" widescreen TFT display that doubles as a digital picture frame. There is a choice of silver and white color schemes, three language options and voice annunciation of alarm conditions.

The new intuitive user interface features icons and menus that make system operation easy to navigate. The 6280 uses the same icons as Honeywell Total Connect™ Remote Services, helping to reduce end-user training and costly false alarms.

The digital picture frame and video viewing features add value to commercial systems by allowing businesses to display special promotions, sales or floor plans, give employees specific information about day to day activities, increase their brand exposure by showcasing their company logo or

business and much more. They can even show infomercials, product spots and employee training videos.

The choice of two color housings and three languages (ideal for businesses with multilingual employees) opens up new opportunities and markets that previously were untapped. Silver blends perfectly in stainless steel restaurant kitchens, garages, warehouses and many other industrial settings. White, a popular classic choice, blends seamlessly with lighter décors such as a doctor's office or front lobby.

To help you close more sales, Honeywell has created a handheld demo (6280WHD) that includes a sales infomercial video that highlights the features and end-user benefits of the 6280. The video can be played by simply pressing a button.

Voice annunciation option in English only.
