Invented for life

## ISN-GMX-P3S Swivel Plate

Use with an ISN-SM-50 Seismic Detector to monitor safes and strong room doors with exposed keyholes. A micro-switch inside the swivel plate monitors movement. Any unauthorized swiveling movement immediately triggers an alarm. When the system is armed, the swivel plate completely covers the keyhole. When the system is disarmed, the swivel plate swings 90° away from the keyhole.
