

LEM Series Intercom**DUAL MASTER DOOR ANSWERING SYSTEM****LEM-1DL/C****FEATURES/FUNCTIONS:**

- * Two LEM-1DL/C master stations able to answer a call from a door station.
- * Occupied lamp lights up when a master station is on, indicating the door is being answered by the other party.
- * Each master has a door release button to activate electric strike.
- * Door release contact can be modified to "normally closed" for use with a magnetic lock.
- * Wall or desk mountable master station.
- * Voice and call tone volume controls.
- * Door station can be surface mount (LE-D) or flush mount (LE-DA).
- * Easy wiring: 2 conductors to door station and 3 conductors between master stations. (Use separate 2-conductor for door release wiring.)

SYSTEM LAYOUT:**SPECIFICATIONS:**

| | |
|-----------------------|--|
| Power Source: | 12-16V AC or 12-24V DC. PT-1210N is 12V AC, 830mA * Use power source appropriate for strike. |
| Current Consumption: | Max. 4W (16V AC) Max. 200mW (24V DC) |
| Output: | 100mW |
| Calling: | Electronic mono tone |
| Communication: | Press-to-talk, release-to-listen at master. Hands free at door. |
| Wiring: | 2 conductors to door station (#822202) 3-conductors between masters (#822203) Separate 2-conductor for door release. (#812202) |
| Wiring distance: | 650' with 22AWG. |
| Door release contact: | Max. 1A at up to 24V AC or DC |

SOME APPLICATIONS:

- **Judges Chambers**
- **Medical Offices**
- **Business Offices**
- **Loading Docks**
- **Secured Room Entry**
