

# SECURITRON SYSTEM # 04

## Application

Single door exit delay system with digital access / egress and key switch reset.

## Operation

Outside Operation: From the outside the door is secured via the M62B Magnalock, entry of a valid code on the DK-26 allows access to the secure area and shunts the exit delay system as well as the alarm contacts.

Inside Operation: The door is secured via the M62B Magnalock. Egress without causing an alarm, is accomplished via valid code on the DK-26 keypad.

Emergency egress is accomplished by actuating the Sargent 12-55-8876 and waiting for the 15 second release delay period. System reset is via the MK key switch.
